INSTALLATION PROCEDURE

READ INSTRUCTIONS BEFORE BEGINNING INSTALLATION

Instructions for Step 6

1. Remove the (4) bolts from passenger side seat rails. Tilt seat and towards door to give access to front OEM trim around seat rail closest to transmission hump.
2. Remove (2) T20 screws and clip from OEM trim. Set aside.
3. Reposition seat and place No Holes Mount base under the seat rails with slots in alignment with seat rail holes.
4. Place the (4) bolts back into the original position tighten. Check to make sure there is no movement at post and that mount base is firmly secured.
5. Assemble the desktop stand to the mount base, starting with the vertical tube. Slide the adjustable brace on the tube and use 2 Hex Head Cap Screws and 2 Lock Washers to secure vertical tube to mount post.
6. To attach brace kit, unclip the lower dash trim from the right and pull to the side. Pull back the carpet exposing the lower dash support mounting points. Remove the right OEM bolt with a 3/8 socket and set aside. Attach the bracket with previously removed OEM bolt and pull the carpet back into place. Cut a small circular hole, enough to route the carpet over the bracket, secure brace with the provided 3pt knob.
7. Place articulated swing arm over the 5/8" end of the telescoping rod. Tighten with ratchet handle.
8. Attach desktop to end of articulated swing arm and secure by tightening ratchet handle.

STAND ASSEMBLY OPERATION

1. Remove Hex Head Cap Screws from stand assembly and place tube over the No-Holes Mount Base.
2. Loosen the 3 point knob on the adjustable brace. Slide into position.
3. Thread (2) Hex Head Cap Screws with (2) Lock Washers through tube and into front and rear of No Holes Mount post at bottom of tube. (A)
4. Raise inner rod to desired height. Thread (2) Hex Head Cap Screws with (2) Lock Washers into front and rear holes at top of tube. (B)
5. Use provided Hex Key to tighten (4) Hex Head Cap Screws to ensure secure positioning.

RATCHET CLAMP OPERATION

NOTE: Insert the ratchet handle through the unthreaded side of the articulated swing arm and tighten. Going through threaded side first will not allow the arm to tighten properly

To adjust, pull handle out (B) and rotate counter clockwise (A), release and tighten. If needed, use 1/8" hex head wrench for adjustment (C)

NOTE: Ratchet handles are spring loaded and can be readjusted to tighten.
